

To: Residents, Families, Visitors and local community

It is with saddened hearts that we have lost 1 resident. We have both residents and staff that have a confirmed positive COVID test within the last 24 hours. The DON will be working closely with the department of health for guidance. All residents and staff will be tested prophylactically per guidelines. Per the department of health with any positive test result the facility will suspend in-person visitation for a period of 14 days. The facility will continue to offer window visits and zoom/video visits. The facility continues to follow all DOH, CDC, and CMS guidelines. Please feel free to reach out if you have any questions. We appreciate the ongoing support during these challenging times.

Sincerely,  
Maureen Bard, LNHA
